# About Us

At ParkIt, we are passionate about revolutionizing the way people experience parking and transportation. Founded during the early-covid period by a group of young entrepreneurs, our next-generation smart technology company is committed to creating innovative solutions that simplify and enhance the parking ecosystem for commercial and residential properties.

Our vision is to transform the parking and transportation landscape, making it more sustainable, efficient, and user-friendly. We strive to deliver innovative solutions that simplify the everyday lives of individuals and improve the overall well-being of communities.

# *Smart **Toll Management** Solutions*

- Our automated toll management solution simplifies toll collection for both commuters and toll operators.
- Leveraging technologies such as RFID and automatic number plate recognition (ANPR), we enable swift and seamless toll transactions.
- By enhancing operational efficiency and reducing traffic bottlenecks, we create a seamless commuting experience for driver.

# SMART TOLL & TRAFFIC **SOLUTION**

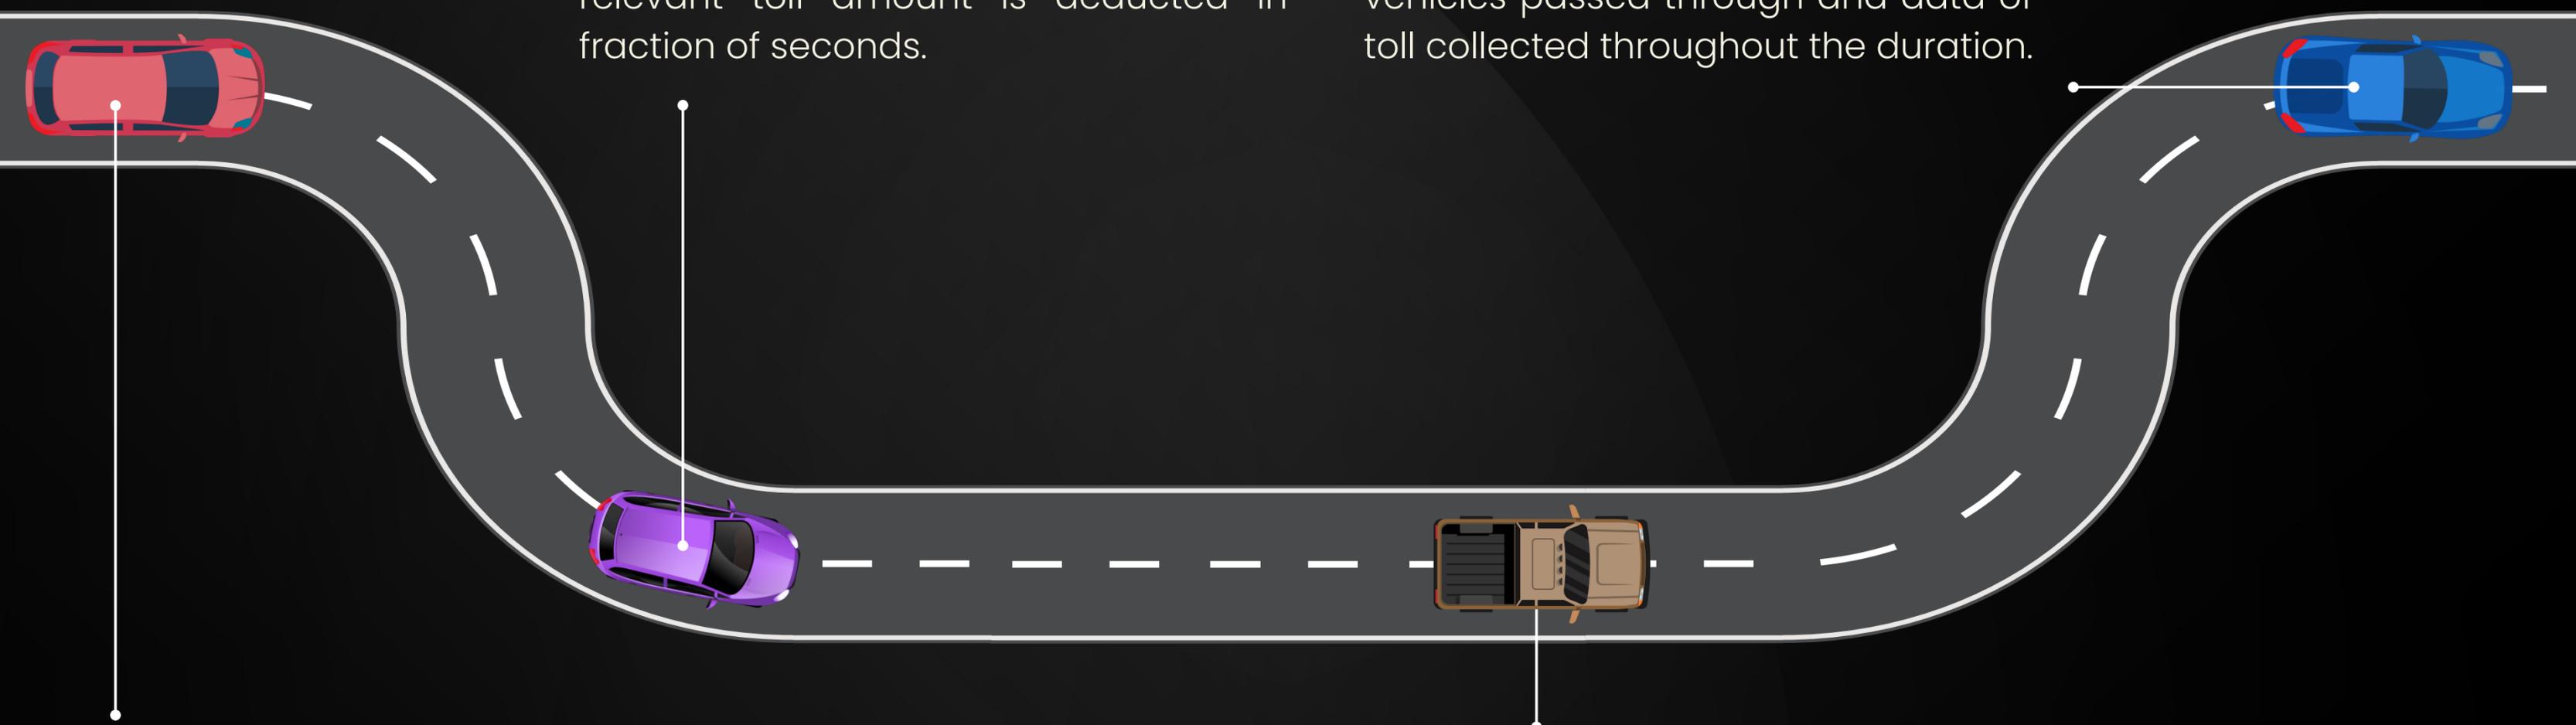

*(FOR TOLL MANAGEMENT)*

## Fastag Toll Deduction

Our RFID Readers scan the fastag and relevant toll amount is deducted in fraction of seconds.

## Statistical Dashboard

Supervisor has the record of all the vehicles passed through and data of toll collected throughout the duration.

## Vehicle Entrance

Vehicle enters the toll plaza and its their turn for the toll payment.

## Blacklisted / Whitelisted

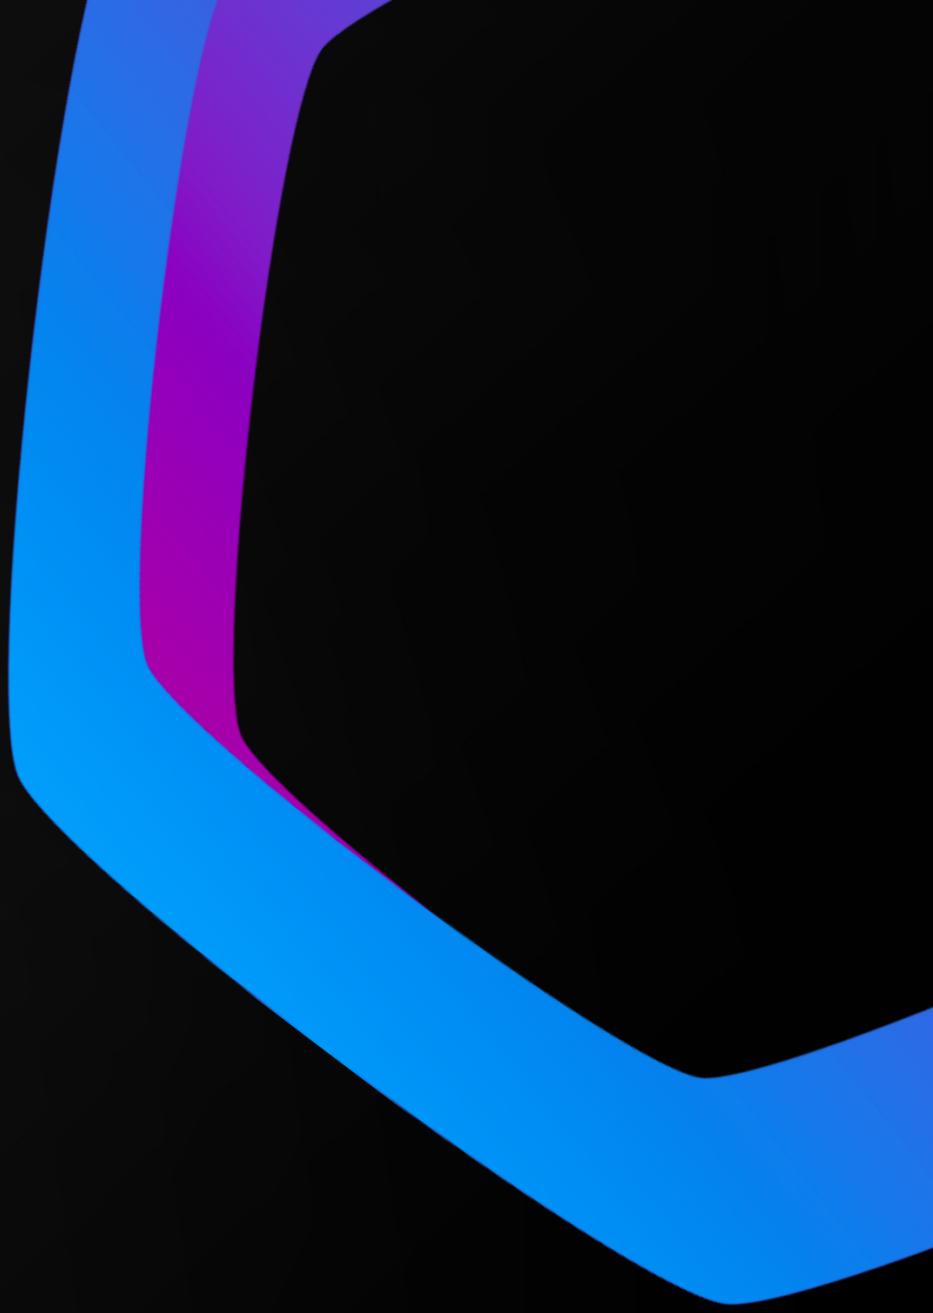

Identification of Fastag being Whitelist or Blacklist. Allows the supervisor make a Fastag whitelisted with due reasons.

# *Smart **Traffic Regulation** Solutions*

- We understand the importance of following traffic rules and regulations for road safety and efficient commute.
- ParkIt software and hardware contributes to abide the rules & regulations like overspeed vehicles, signal jumping, illegal vehicle parking and so on..
- Our ANPR Cameras and RFID Readers can easily identify and notify the traffic regulatory bodies.

# SMART TOLL & TRAFFIC **SOLUTION**

*(FOR TRAFFIC REGULATIONS)*

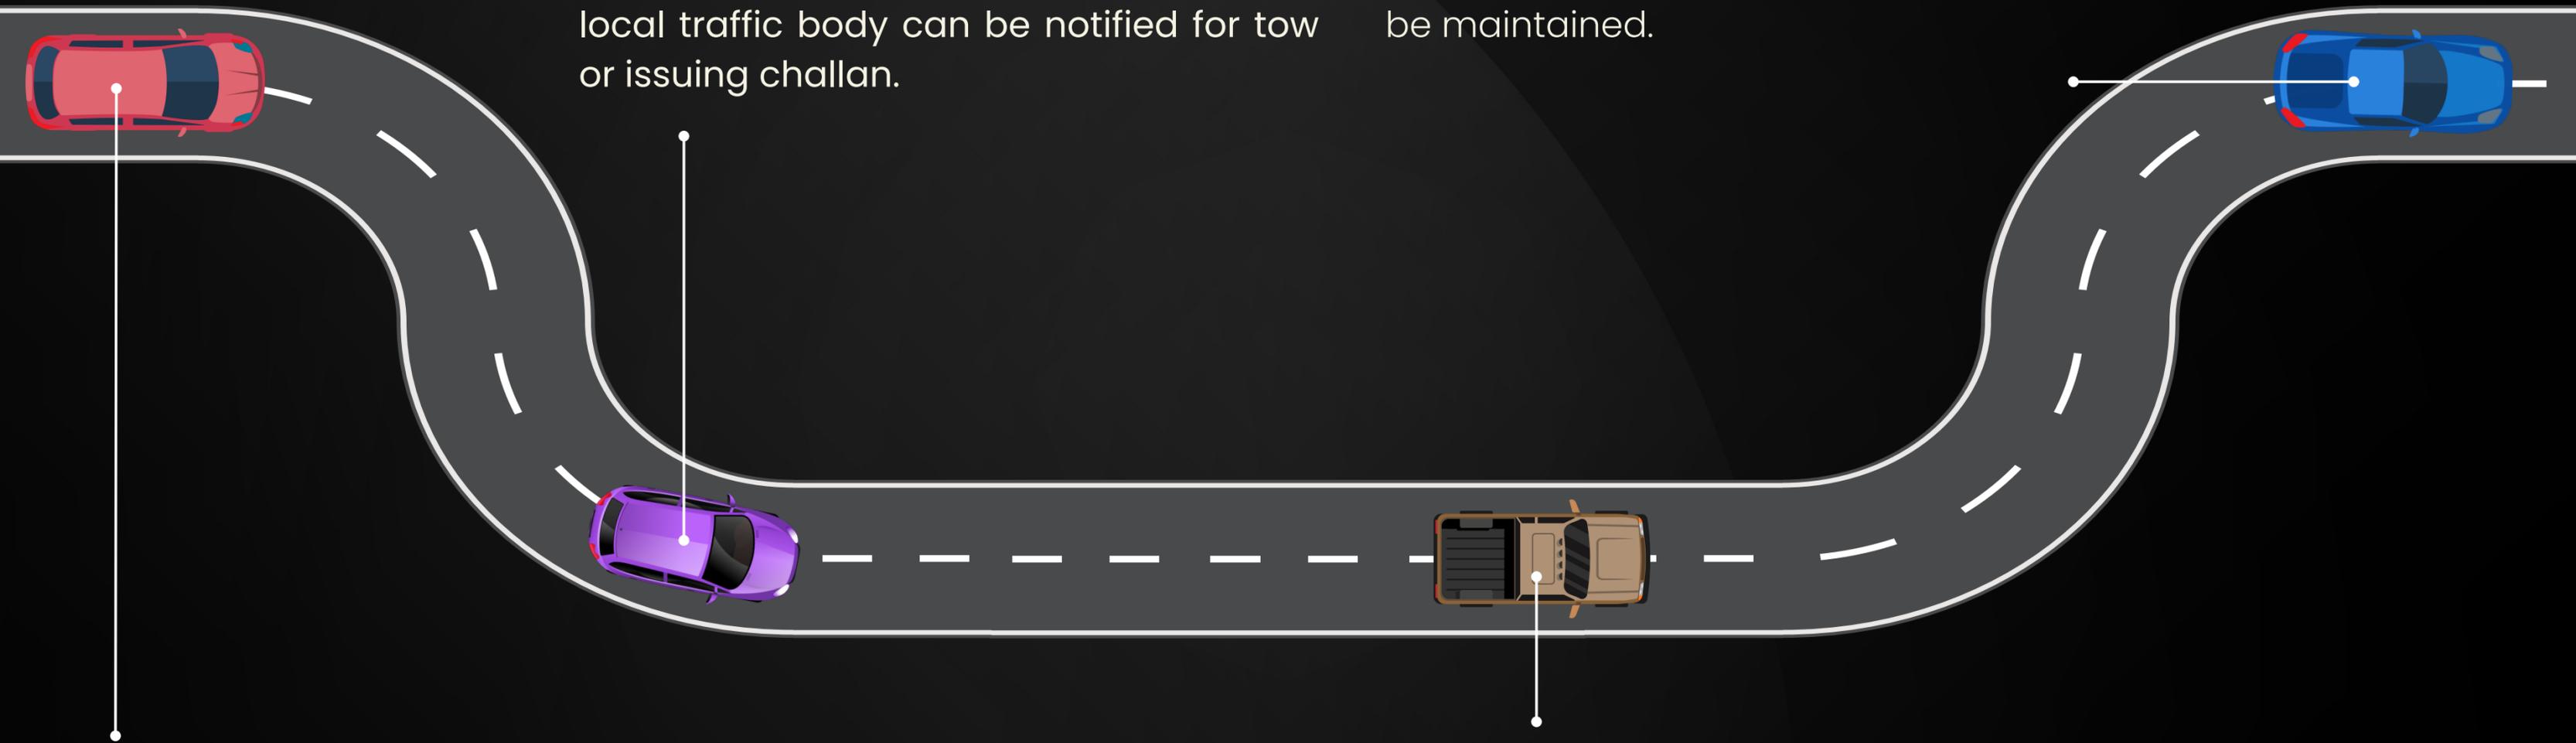

## Illegal Parking

vehicles parked at **No Parking** are detected through the hardware and local traffic body can be notified for tow or issuing challan.

## Vehicle Database

Record of vehicle passing through a route can be tracked and record can be maintained.

## Overspeeding Vehicles

Our ANPR Cameras immediately identifies vehicle running at speed more than the advised speed for the route.

## Signal Jumping

Vehicles passing the pedestrian cross while the signal is RED, can be detected and notified to traffic body for issuing challan.
